PRODUCT INFORMATION

Product name: Bamboo Pacifier Newborn

For your child's safety:

WARNING!

- Inspect carefully before each use. Pull the soother in all directions. Throw away at the first signs of damage or weakness.
- Only use dedicated soother holders tested to EN 12586. Never attach other ribbons or cords to a soother, your child may be strangled by them.
- Never dip the teat in sweet substances or medicine, as this may cause tooth decay.
- Do not expose the soother to direct sunlight or any heat source. Do not leave in a disinfectant (sterilizing solution) longer than recommended as it can weaken the teat.
- Before first use place the soother in boiling water for 5 minutes. Allow to cool and squeeze the teat to remove any water left inside. This is done for hygienic reasons.
- Clean the soother thoroughly before each use.
- For hygienic and safety reasons, replace the soother after one- or two-months use.
- If the soother becomes lodged in the baby's mouth, do not panic! The soother cannot be swallowed and has been designed so that this type of situation can be easily rectified. Remove from the mouth as carefully and gently as possible.
- Please read the instructions carefully and keep the packaging for future reference.
- Warning! Do not tie a soother around child's neck as it presents a strangulation danger.

Place and date of issue: Stockholm, 12-03-2026
